

Mini Comics Instructions

bugzappercomics.com

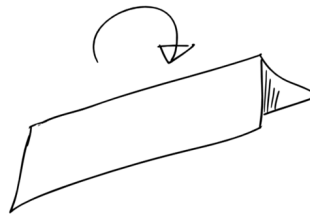

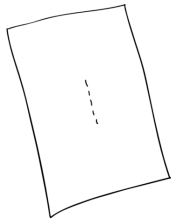

Minicomics are small comic books that can easily be reproduced on a copy machine, as they're made from a single, one-sided piece of regular paper.

First, draw on the blank template, starting with page 1. "Front" will be your front cover, and "back" will be the back cover. (Look at the provided Bug Zapper example to see how it should go.)

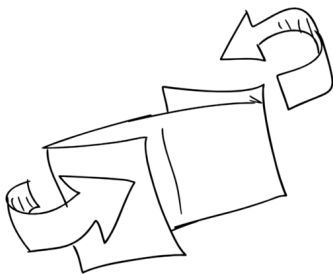

To copy, just unfold the comic book and put it on a copy machine. After copying, fold each one back up.

You can give them to family & friends!

1. Cut the dashed line in middle with scissors.
2. Fold paper the long way.

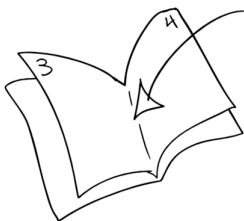

3. Fold pages 4 & front cover over.

4. Pull out middle.

5. Push in between pages 3 & 4.

6. Close as book!
